About these statistics

Every Friday, the Swedish Booksellers Association and the Swedish Publishers Association will publish weekly sales of physical books for the channels physical bookstore, internet retailers/book clubs and grocery stores as long as the Corona pandemic is ongoing. The Swedish organization Bokinfo publishes the corresponding information on a daily basis accessible to anyone with access.

The statistics are based on the sales reported on May 15, 2020. These sales statistics, that are normally covered on an annual basis, usually includes digital subscription services, and are estimated to cover more than 80 percent of all sales in general literature in Sweden. Since digital subscription services are excluded in these separate sales statistics due to the Corona crisis, the coverage of these statistics of total sales of general literature is lower than usual. It is worth noting that the fallout in the population consists mainly of small, independent players in the physical bookstore and sales in the grocery store.
